EDUCATION

University of Florida

B.S. in Computer Science, Minor in Business Administration

Certificate in Artificial Intelligence Fundamentals and Applications

Gainesville, FL

Expected December 2026

EXPERIENCE

AI Engineer

September 2026 – Present

Handtevy (Pediatric Emergency Standards)

Davie, FL

- Owned and productionized an EMS document-intelligence pipeline, eliminating **8–12 hours of clinical onboarding and revision work** per agency across roughly **3,000 agencies serving 200,000+ clinicians**.
- Rearchitected extraction and validation workflows to cut per-PDF processing cost from **\$150+ to under \$5** and runtime from **45+ to under 3 minutes**, while achieving **99% field-level accuracy**.

AI Engineer Intern

May 2026 – August 2026

Handtevy (Pediatric Emergency Standards)

Davie, FL

- Built the first document-intelligence pipeline, using Python extraction and deterministic validation to convert **700+ page EMS protocols** into structured clinical data, **reducing manual processing time by 99.7%**.

Software Engineer Intern

May 2025 – August 2025

UKG (Ultimate Kronos Group)

Weston, FL

- Improved runtime performance by **25%** and eliminated recurring deployment regressions by refactoring 18+ high-traffic pages across a distributed C#/ASP.NET production platform.
- Reduced backend test-suite runtime by **40%** and accelerated deployment cycles by stabilizing **600+ NUnit tests**; authored a CI/CD debugging guide adopted by 50+ onboarding engineers.

SELECTED PROJECTS & OPEN SOURCE

Accordo – Next.js, TypeScript, PostgreSQL, Prisma, Stripe

[Live Product](#)

- Built and launched a full-stack marketplace for musician discovery, contracts, and Stripe payments; onboarded over **50 initial users** and processed **\$10,000+ in transactions**.

Kit.ai – React, WebLLM, WebGPU, IndexedDB

[Live Demo](#)

- Engineered an offline-first first-aid PWA using WebLLM, WebGPU, and IndexedDB to run Llama 3.2 entirely in-browser, enabling on-device inference with **zero network dependence** after initial setup.

Nova – Next.js, Node.js, Bitcoin, Ethereum, Solana

[Live Demo](#)

- Developed a multi-chain invoicing platform supporting BTC, ETH, and SOL payments with QR generation and on-chain settlement tracking; won **Best Use of Solana** at SwampHacks among 100+ teams.

Open-Source Contributor – Docling, Inspect AI, Outlines, Weaviate, music21

[GitHub](#)

- Authored **16 merged upstream PRs** across Docling, Inspect AI, Outlines, Weaviate, and music21, including a Box Note backend, vLLM structured-output fixes, and deterministic multi-agent crash recovery.

TECHNICAL LEADERSHIP

Lead Software Engineer

January 2025 – August 2026

Machine Intelligence Lab

Gainesville, FL

- Designed and shipped an interactive Three.js website for UF's SubjuGator autonomous underwater robotics team, ranked **14th in Team Website** at RoboSub 2025, an international competition with 58 teams from nine countries.

Lead Software Engineer

September 2024 – August 2026

Society of Hispanic Professional Engineers (SHPE)

Gainesville, FL

- Directed development of an iOS app for 300+ members using Swift and Node.js, establishing a GitHub Actions/Fastlane CI/CD pipeline that reduced release time by **85%**.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C++, Java, C#, SQL, Swift

Frameworks & Testing: FastAPI, React, Next.js, Node.js, ASP.NET, Pydantic, Pytest, NUnit

AI/ML: RAG, hybrid retrieval, embeddings, OCR/document parsing, LLM evaluation, LangGraph, PyTorch, OpenCV

Data & Infrastructure: PostgreSQL, MySQL, MongoDB, OpenSearch, Prisma, AWS (S3, SQS, Cognito), Docker, Linux, GitHub Actions
